

Hope Artificial Intelligence

Scenario Based Learning

A company works with number of employees, all the works are dependents on the employees. Even if one of the employees resign the job immediately then assigned work will be not finished at the time, so delivery of the project to the clients will be delayed. Company planned to make solution for this, they want to know which employee may resign this month or next. If they know previously, they can arrange alternative to avoid such problem. As an AI Engineer you must give Solution to this.

- A) How will you achieve this in AI?
- B) Find out the 3 -Stage of Problem Identification
- C) Name the project
- D) Create the dummy Dataset.

1. How will you achieve this in AI?
Based on Employee performance. We can predict.
2. Find out the 3 -Stage of Problem Identification.
Stage 1: ML
stage 2: Supervised Learning
stage 3: Classification.
3. Name of Project
Employee attrition Survey.
4. Data set.
 - Employee Name
 - Employee ID
 - Employee Supervisor
 - Employee Salary
 - Employee Appraisal
